

# Things done so far

- 2 instances of the ALA portal demo
- One of them with a modified taxonomic backbone
- Extended the biocache module to allow harvesting of BioCAsE web services

# Plans (tentative)

- 10 year project „Atlas lebendiges Deutschland“ that will include the occurrence portal
- Smaller side project with additional features for botanical specimens (multiple identifications, associations between specimens, annotation system, usage of German checklists)

# Questions

- Integration of specific checklists
- Multiple or empty checklists?
- Images on image servers
- Plugging-in of other web services
