

Setup instructions for Herbar Setup instructions for Zoorbar

Herbar

Setup

A.- Extract the files from the .zip to a directory for this purpose

Before proceeding, if a C:\Herbar directory already exists, it must be renamed to C:\Herbar_old or with any desired meaningful name, or make backup of the entire directory. Afterwards, download the program. Unzip the downloaded file to C:\ and it will automatically create a directory **C:\Herbar**.

B.- Run the application

By double-clicking on **Herbarium.mdb** you will be able to run the application.

C.- Set language and other parameters of Herbar

In the main menu we can select where we want to locate the configuration file for collections (herbasys.mdb), as well as the language we want to use.

For any questions or queries, please contact the Coordination Unit.

We also perform migrations for other types of databases or formats such as Excel. If you are interested in that process, please contact the Coordination Unit.

Zoorbar

Installation

A.- Extract the files from the .zip to a directory for this purpose

Before proceeding, if a C:\Zoorbar directory already exists, it must be renamed to C:\Zoorbar_old or with any meaningful name, or make a backup of the entire directory. Afterwards, download the program. Unzip the downloaded file to C:\ and it will automatically create a directory **C:\Zoorbar**.

B.- Run the application

By double-clicking on **Zoorbar.mdb** you will be able to run the application.

C.- Set language and other Zoorbar parameters

In the main menu we can select where we want to locate the configuration file for collections (herbasys.mdb), as well as the language we want to use.

For any questions or queries, please contact the Coordination Unit.

We also perform migrations for other types of databases or formats such as Excel. If you are interested in that process, please contact the Coordination Unit.
