## WORKING ON IT

- Rescuing the orphan datasets that were published from Digir and Tapir.
- Upgrading the software and instance of Spanish Data Portal:
  - More resources.
  - generic-hub updated.
  - Collectory updated.
  - biocache-service updated.
  - New index module with Solr6.
  - New biocache-cli with cassandra3.
- Include more modules:
  - Images.
  - Regions.
- Loading 25 millions records.
- Using the name-matching based on GBIF Backbone.
- New design.
- Helping to the community: Nodes like GBIF Andorra, Portugal Luxembourg and our providers: Barcelona, CSIC,...
- Include Citizen Science observations in the Data Portal through Natusfera.
- Trying to solve some problems that we have like:
  - Issues after migrations.
  - New Storage SSD.
