COMMENTARY

A universal register for animal names

Andrew Polaszek and colleagues propose an open-access web-register for animal names, which they believe is vital to move taxonomy into the twenty-first century.

ZooBank: Developing a nomenclatural tool for unifying 250 years of biological information*

RICHARD L. PYLE¹ & ELLINOR MICHEL²

Technical implementation

ZooBank was launched as a functional prototype web site (<http://zoobank.org>) on January 1st, 2008, coinciding with the 250th anniversary of the official start of Zoological Nomenclature. At its launch the ZooBank registry included 4,819 names established in the 10th Edition of Linnaeus' *Systema Naturae* (Linnaeus, 1758), as well as five new fish species names established in an article published concurrently with the launch of ZooBank. Since that time, additional nomenclatural acts, published works, authors and type specimens have been both prospectively and retrospectively registered.

Amendment of Articles 8, 9, 10, 21 and 78 of the *International Code of Zoological Nomenclature* to expand and refine methods of publication

International Commission on Zoological Nomenclature

c/o Natural History Museum, Cromwell Road, London SW7 5BD, U.K. (e-mail: iczn@nhm.ac.uk)

ABSTRACT

The International Commission on Zoological Nomenclature has voted in favour of a revised version of the amendment to the *International Code of Zoological Nomenclature* that was proposed in 2008. The purpose of the amendment is to expand and refine the methods of publication allowed by the Code, particularly in relation to electronic publication. The amendment establishes an *Official Register of Zoological Nomenclature* (with ZooBank as its online version), allows electronic publication after 2011 under certain conditions, and disallows publication on optical discs after 2012. The requirements for electronic publications are that the work be registered in ZooBank before it is published, that the work itself state the date of publication and contain evidence that registration has occurred, and that the ZooBank registration state both the name of an electronic archive intended to preserve the work and the ISSN or ISBN associated with the work. Registration of new scientific names and nomenclatural acts is not required. The Commission has confirmed that ZooBank is ready to handle the requirements of the amendment.

The screenshot shows the homepage of ZooBank, the Official Registry of Zoological Nomenclature. The page features a dark blue header with the ZooBank logo and navigation links (about, contact, api, login, help). Below the header, the main content area is light blue and contains a search bar, a statistics section, and a 'Contribute to ZooBank' section with a 'create an account' button. The statistics section displays three metrics: 346,262 Nomenclatural Acts, 154,931 Publications, and 103,025 Authors. The 'Contribute to ZooBank' section includes an illustration of two colorful birds perched on a branch.

Que es y que no es el ZooBank

- ▶ ¿Qué es ZooBank?
- ▶ Es el Registro Oficial de la Comisión Internacional de Nomenclatura Zoológica.
- ▶ Visión: ZooBank es un recurso central, confiable y completo para los nombres científicos en zoología.
- ▶ Misión: ZooBank proporciona un registro en línea, de acceso abierto y confiable, generado por la comunidad, para la nomenclatura zoológica, como un servicio para taxónomos/as, biólogos/as y la comunidad global de informática en biodiversidad.
- ▶ ¿Qué NO es ZooBank?
- ▶ Zoobank NO es un registro completo de los registros de las especies.

- ▶ ¿Qué se registra en ZooBank?
- ▶ Actualmente, ZooBank acomoda el registro de cuatro tipos diferentes de datos:
 - Actos Nomenclaturales.
 - Publicaciones: Publicaciones que contienen Actos Nomenclaturales.
 - Autores: Cualquier persona que sea autor de una o más publicaciones (según se define arriba), o que sea un contribuyente al contenido de ZooBank.
 - Tipos: Tipos para nombres científicos de animales. El registro de Especímenes Tipo se considera provisional y aún no está completamente implementado en ZooBank.
